

TELESCOPIC DIPPER

**Go Deeper.
Reach Further.
Perform Better.**

Engineered for deep excavation
& high-efficiency underground
operations.

KOMAC

Technology with Passion

WHAT IS A TELESCOPIC DIPPER?

A hydraulically operated extension attached to an excavator arm that allows:

- ✓ Deeper excavation
- ✓ Extended reach
- ✓ Safer underground operations

Replace cranes in deep projects
with better **precision & efficiency.**

WHY TELESCOPIC DIPPER?

03

Reach depths up to **30m+**

Reduce need for multiple machines

Improve safety in confined spaces

Increase project efficiency

Ideal for urban & underground work

BUILT TO WORK. BUILT FOR THE WORLD.

04

KOMAC equipment is trusted
across the globe for tough jobs
and reliable performance.

GLOBAL PRESENCE

Operating in 100+ countries
with a strong dealer network.

TRUSTED BY PROFESSIONALS

Preferred by contractors and
rental fleets worldwide.

BUILT FOR TOUGH CONDITIONS

Engineered to perform in the world's
harshest environments.

SUPPORT YOU CAN COUNT ON

Local support, genuine parts and
expert service – wherever you are.
